

Dock Shelters

Designed to provide full access to the trailer opening, dock shelters speed up loading and unloading the rear of the trailer while reducing damage that would typical occur on a dock seal. The seal is set through the use of hanging curtains with spring steel stays designed to slide along the outside of the trailer as it docks, providing an effective weather seal regardless of the trailer size.

Standard Features

- ✓ Base material to be 40 oz. per square yard vinyl coated polyester with high tear Duropreen vinyl coated polyester for high wear areas
- ✓ Pressure treated lumber frame covered with translucent fiberglass (top and side frames) to allow natural light into the dock area.
- ✓ Coated polymer fabric face curtains have foam bead on inside edge, which conforms to trailer for better seal.
- ✓ Spring steel stays enclosed in heavy duty vinyl pockets ensure the shelter curtains remain seated against the trailer. No breakage.
- ✓ Peaked header frame prevents water collection on top.
- ✓ Heavy duty wear pleats on bottom corners of curtains protects from impact of lower trailer corners.
- ✓ Bungee cord prevent head curtain from blowing out of position.
- ✓ Four overlapping heavy duty wear pleats in each corner of the header absorb impact of sharp trailer edges.
- ✓ Foam-filled draft pads fill the lower corners preventing air from entering from below. "NO STEP" safety logo permanently affixed.
- ✓ Heavy-duty steel bumper guards support frame and provide protection from incoming trailers.

Optional Features

- Soft Side Shelter

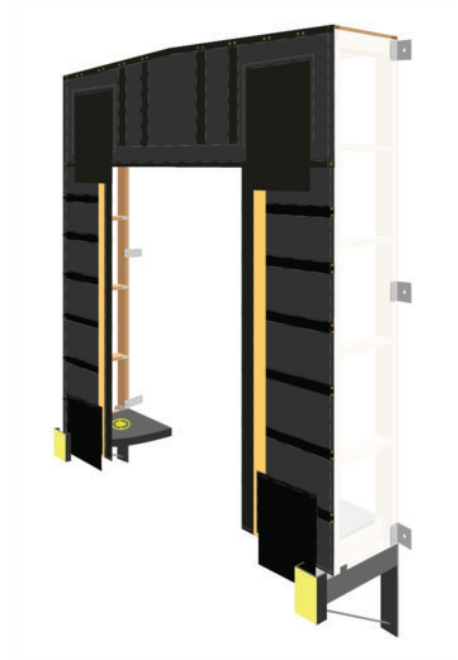

Vinyl Cover Material

Type	40oz Vinyl	Heavy Duty Vinyl
Fabric Base	Woven (31x31)	Woven (30x30)
Coating Type	Poly Vinyl Chloride	Poly Vinyl Chloride
Coating Distribution	76% Front/24% Back	Not Specified
Tongue Tear	126 lbs. 149 lbs.	200 lbs. 195 lbs.
Fire Rating	Not Rated	Self Extinguishing
Low Temp. Rating	-40 F	-40 F
Resistance	Mildew & UV Resistant	Anti-Mildew & UV Resistant

Rigid Frame Dock Shelter

Model	SH402
Outside Dimensions	11'9" wide x 11'3" high (Including angles)
Inside Dimension	Closes opening to 7' x 8'
Hardware	Galvanized 90 deg. angles Lag bolts included

Soft Side Dock Shelter

Model	SS402
Outside Dimensions	11'9" wide x 11'3" high (Including angles) - Adjustable Cable support system attaches above header - Variable position
Inside Dimension	Closes opening to 7' wide x 8' high
Hardware	Galvanized 90 deg. angles Lag bolts included
